

Helping Patients Heal

Shannon has worked at Roper St. Francis for many years. In 2014, she was diagnosed with breast cancer and treated at Roper St. Francis Cancer Care. There, she was set up with Wellness Navigator Jody McCrain, who guided her through every stage of the cancer journey. Jody's position is funded 100% through philanthropy.

"Jody was amazing, making sure no one falls through the cracks. I don't want to go through it again, but they do a great job at navigating the process. I can't imagine going through [diagnoses and treatment] without those resources. Now that I've been through it [breast cancer], I have even more patience, compassion, and drive to make sure my patients have a great experience."

THANK YOU

Every day, teammates work hard to bring compassionate, quality care to patients when they need it most.

Your gift to the Roper St. Francis Foundation provides the extra margin of excellence that is so important to each member of the Roper St. Francis family.
